Experience

JUNE 2018 - PRESENT

UrbanPiper, Bangalore – *Web Developer*

- Building a comprehensive admin platform which will be used by clients in Food and Marketing across India.

AUGUST 2017 - JUNE 2018

Strike, Bangalore – *Web Developer*

- I primarily work on building and maintaining various web portals.
- I have helped in designing and building some libraries for distributed systems e.g. imap-sync, distributed locking, distributed task scheduler, etc.
- I have also written some automation scripts to scrape websites for information, specialized CLI tools to parse and format CSV Files.

OCTOBER 2015 - JULY 2017

TCS, Bangalore – *Associate Systems Engineer*

- My responsibilities included developing and maintaining internal tools for clients.
- I had taken initiative to optimize the workflow of client's capacity planning by developing sophisticated automation tools.
- As an added responsibility i also created shell script for automation.

SEPTEMBER 2016 - PRESENT

Freelancing, Bangalore – *freelance web developer*

- Helped in creating admin portal for an upcoming food delivery service.
- <http://www.ndecor.in> – Created portfolio website for an independent interior designer
- <http://www.imperialsteel.in> – Website for a small manufacturing firm

2014 - 2015

Final Year Project, Bhilai – *linux enthusiast*

- I built a minimal Linux operating system from scratch with the help of open source project: Linux From Scratch. It uses the GNU Linux kernel. It has command-line interface to facilitate the user interface. Technologies Used: GNU C/C++ Library, Bash.

Education
